Highlighting text

In this slide, some important text will be highlighted with JHU color because it's important. Please, don't abuse it.

Remark

Sample text

Important theorem

Sample text in the red box

Examples

Sample text in the green box. The title of the block is "Examples".

Enumerate and itemize test

Enumerate environment with classic colors

1. Hello, this is the first point
2. This is my second point

Itemize environment with JHU colors

- This is a separate itemize test
- Second point for the separate test

Table of Contents

Integration is also known as anti-derivative which represents the area under the curve. For indefinite integral, we should add a constant C to the anti-derivative expressions.

$$\int \exp(x)\ dx = \exp(x) + C$$

You can **boldface colors** to emphasize even more[1].

Theorem (Pythagoras)

$a^2 + b^2 = c^2$

Theorem (Pythagoras)

$a^2 + b^2 = c^2$

Corollary

$x + y = y + x$

Theorem (Pythagoras)

$a^2 + b^2 = c^2$

Corollary

$x + y = y + x$

Proof.

$\omega + \phi = \epsilon$ □

References

Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like "Huardest gefburn"? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special contents, but the length of words should match the language.[3]
